# GROWING REDWOOD BURL

These beautiful plants are growths that are cut from the giant Redwoods. They are placed in a small amount of water or kept upon the damp Redwood moss which we furnish, and will grow beautiful, long green shoots and leaves of the Redwood Tree from which the burl was cut. They will lend that cool, fragrant atmosphere of the Redwood Forest to their surroundings inside, or can be moved to the Rock Garden or Pool during fair weather.

## FREE FERNS and MOSS

To guarantee fresh delivery, we pack each burl in damp, green moss, which is gathered from the forest, and include a few cut Wild Ferns, or native plants with each order. A Redwood Cone will also be included if asked for, or will be shipped separately for 10c each postpaid. Cut wild ferns may be had at 50c per dozen, Express collect.

*Each Burl Is Fresh Cut And Perfect And Shows Sprouts*

### PRICES

50c - \$1.00 - \$1.50

Shipped via Express collect for postage.

(Burls weigh from one to three pounds, according to size desired.)
